

1st PEMNet National Extension Conference 2026

ABSTRACT TEMPLATE

Theme: HEIs at the Forefront of Transformative Extension: Advancing Evidence-Based, Inclusive, Sustainable, and Resilient Community Development

Instructions: Complete all sections. Select only one paper category and one thematic area. Use clear, evidence-based statements and avoid unsupported outcome or impact claims.

A. Paper Information

1. Title of the Extension Project Paper	Bayanihan: Engineering Extension Program (B-EEP) Project 2: Electrical Wiring and Troubleshooting Training Phase 2
2. Author/s and Institutional Affiliation/s Note: Use an asterisk (*) after the name of the project leader. If the presenter is not the project leader, write "paper presenter" after the name	Engr. Norman C. Francisco* Dr. Jackilyn Kate A. Mayorca Engr. Glenda A. Cabandong Dr. Marlon A. Bautista Prof. Jocelyn C. Rubio Engr. Michael L. Pascua Engr. Joshua P. Tejada Engr. Von Cyrell DI San Jose Engr. John Neil B. Herrera Prof. Marissa Yolanda C. Samonte Municipality of Pililla Brgy. Wawa, Pililla, Rizal Teaching Education and Skills Development Authority
3. Name and Email Address of Corresponding Author	Engr. Norman C. Francisco* norman.francisco@urs.edu.ph
3. Paper Category	☒ Completed Extension Project Paper ☐ Ongoing Extension Project Paper
4. Thematic Area (choose 1 only)	☐ Food Production, Agriculture, Fisheries, and Natural Resource Systems ☐ Health, Nutrition, Wellness, and Community Care ☒ Education, Literacy, Skills Development, and Lifelong Learning ☐ Livelihood, Entrepreneurship, Cooperatives, MSMEs, and Local Economic Development ☐ Environment, Climate Action, Disaster Risk Reduction, and Community Resilience

B. Extended Abstract Narrative

Guide: Write concise paragraphs under each required component.

1st PEMNet National Extension Conference 2026

5. Community or Sectoral Need Addressed

Briefly describe in not more than 150 words the validated community, institutional, or sectoral need addressed by the project.

The project was launched at the formal request of Barangay Captain Cesarshane P. Amores.

The Barangay Wawa, Pililla, Rizal expressed a validated need for accessible technical-vocational training to help residents gain formal electrical skills and improve employability. A pre-training survey of 30 participants showed that while 73.33% had informal construction-related experience, none held formal electrical certifications, and 26.67% were complete beginners. The barangay sought assistance so residents could acquire competencies aligned with TESDA NC II standards, enabling them to pursue stable employment or self-employment in electrical installation, CCTV setup, and FDAS work. This need was reinforced by the community's request for NCII certification opportunities to support livelihood and economic advancement.

6. Project Objectives

State the main objective/s of the extension project.

1. Equip the beneficiaries with basic electrical training skills; and
2. Assess the learning acquired by the beneficiaries as reveal in their performance through the TESDA National Competency II (NCII).

7. Extension Methods, Strategies, or Activities Implemented

Describe in not more than 300 words the major extension approaches, methods, strategies, or activities implemented.

The project employed a structured developmental model consisting of planning, surveying, coordination with LGU partners, needs assessment, MOA signing, module preparation, and scheduled training sessions. Training was delivered through face-to-face lecture-demonstrations and extensive hands-on practical exercises using provided electrical materials. Module-based instruction covered basic electrical installation, CCTV installation, and Fire Detection and Alarm System (FDAS) installation.

Innovative strategies included engaging successful beneficiaries from Phase 1 as resource speakers, implementing peer-assisted learning during hands-on sessions, and expanding the curriculum to include modern systems and entrepreneurial skills. Ethical protocols were strictly followed, including informed consent and compliance with the Data Privacy Act. The project progressed through four phases: preparation and partnership building, training implementation, TESDA NCII assessment, and evaluation/reporting.

8. Key Outputs, Emerging Results, and Evidence of Outcomes, Adoption, or Utilization

Briefly present in not more than 300 words the documented outputs and emerging results of the project. Include available evidence of outcomes, adoption, utilization, capability-building, institutional change, or public value, if applicable. Claims must be supported by verifiable evidence.

a. Major Outputs or Emerging Results

The project trained 30 residents of Pililla, Rizal through 96 hours of combined lectures and hands-on exercises covering electrical installation, CCTV setup, and FDAS installation. All of the trainees completed the full program and 18 proceeded to TESDA NCII assessment. All 18 assessees (as of July 2025) achieved a 100% passing rate and were awarded TESDA NCII Electrical Installation and Maintenance certificates. Training evaluations across all modules

1st PEMNet National Extension Conference 2026

yielded consistently high ratings, with a grand mean of 4.62 (“Lubos na Sumasang-ayon”), indicating strong satisfaction and effective skill acquisition.

b. Evidence of Outcomes, Adoption, or Utilization

[Type response here. If not yet available, write: “Not yet available.”]

Initial tracking shortly after the successful certification showed that 5 graduates secured permanent employment in government and private institutions, while 5 others became self-employed skilled workers, demonstrating early livelihood utilization of the acquired competencies. Now all of them have landed a job (both company or government employee and self-employed). Beneficiary evaluations also reflected unanimous “Lubos na Sumasang-ayon” ratings, indicating strong acceptance and perceived usefulness of the training.

c. Supporting Documents/Evidence Available

[Examples: attendance sheets, monitoring reports, photos, testimonials, adoption records, partnership agreements, policy issuances, utilization reports, or other proof.]

Attendance sheets; MOA; Consent forms; pre-training survey results; training modules; photos of lecture and hands-on sessions; TESDA NCII certificates; evaluation forms; accomplishment reports; certificates of appearance; monthly accomplishment logs; gallery of training and assessment activities; and the completed terminal report.

9. Sustainability Direction or Next Steps

Explain in not more than 150 words how the project will be sustained, institutionalized, scaled, or improved, or state the next steps for ongoing projects.

The project is recommended for continuous implementation in additional barangays to expand community reach and livelihood impact. Future phases will integrate feedback from Phase 2 to enhance training modules and explore partnerships with private electrical firms for potential OJT and job absorption. Coordination with LGUs and TESDA will continue to support remaining trainees who have yet to complete NCII assessment. The proposed B-EEP Project 2 Phase 3 aims to institutionalize the program as a recurring community-based technical-vocational initiative within Rizal Province.

C. Keywords

10. Keywords, three to five keywords:

Electrical Skills Training; TESDA NCII; Community Development; Technical-Vocational Education; Livelihood Enhancement
